

MERITOR® WHEEL SEAL STARTER KITS

MERITOR

Meritor wheel seals are engineered to deliver optimum performance – protecting against contaminants for long life and low cost of operation. Look for the Meritor wheel seal part number to make sure you're getting the most durable and reliable seal.

Easy to fit. Hard to damage.

Meritor wheel seals have been designed with an extremely stiff profile and one of the thickest steel cases used in a seal today. So the potential for installation damage is virtually eliminated. Best of all, you can use any tool to install it – even your hands.

Superior protection.

The multi-zone labyrinth design and low-friction barrier delivers unmatched durability and protection against dirt, grime, water and other contaminants. The bumper transmits the fitting force from the front of the seal to the seal outer diameter, and acts as the first defense against contaminants. The multi-zone labyrinth features low profile section right angle corners, low friction barrier, two rubber wipers and a specifically formulated water-proof grease – for superior protection.

A choice of grades.

Designed for drive, steer and trailer axles, Meritor wheel seals are available in standard and premium versions.

Our standard wheel seals feature a nitrile compound (NBR) rubber for the sealing lip. Our premium wheel seals feature a hydrogenated nitrile (HNBR) rubber, offering additional advantages of higher temperature capability, greater wear resistance, and compatibility with all known synthetic lubricants.

Industry-leading warranty.

Our Standard wheel seals are backed by a 1-Year/150,000-Mile warranty, while our Premium seals come with a 2-Year/300,000 Mile warranty.

Platinum Wheel End Warranty.

Combine our Premium wheel seals with Meritor PlatinumShield II coated brakes (new or reman) to extend the warranty to 3-Year/Unlimited Mileage.
